

## CARLSON TESTER AUTHORIZED SERVICE

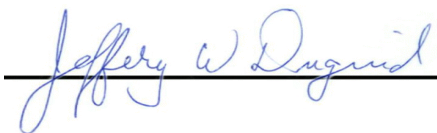

to: CARLSON LOAD TESTER USERS

from: MOYER PROCESS & CONTROL COMPANY, INC.

Dear Carlson Customer,

We want you to know that your Carlson tester is in good hands when you send it to us for service. Whatever you may have been told, concerning Carlson testers, they remain the backbone of the spring industry, and are the tester by which others are measured. We at MOYER have for years been repairing and updating existing Carlson testers. In most cases, these testers can be serviced with modern components and returned to like new or even better than new performance. Because we only charge for time and material, we keep service costs low. We repair to the component when possible, and we have the latest software for MET, MTT, HTT type testers, supplied direct to us by CARLSON. We even repair the CET series. From a cold solder joint to a complete retrofit, we have done it all.

Yours truly,

Jeffery W. Duguid V.P. Eng.
